## DE-ICE

FROST & ICE REMOVER

### DESCRIPTION

Fast, simple and safe way to quickly melt ice and frost from windows and windshields. Loosens and melts frost and ice for quick and easy removal. Helps improve visibility by preventing ice buildup once applied. Will prevent ice formation for hours if used in advance. This product will thaw ice and frost from headlights, locks, doors, icy steps, equipment, and many other surfaces. Helps traction of wheels on extra thin ice. Helps prevent fogging when applied to inside of window surfaces.

### USES / BENEFITS

- Quickly Melts Ice & Frost
- Improves Visibility
- Helps Prevent Ice Formulation

### DIRECTIONS FOR USE

Brush away loose snow and ice on windshield. Etch the entire length of the ice on the windshield with the edge of a key or scraper and spray product into the etched area. After spraying the etched area, apply a thin coating over the entire surface. On automobiles, windshields should be sprayed before windows, locks, or doors to allow ice to melt before starting wiper blades. To prevent fogging of inside windows, wipe with a clean cloth dampened with product.

### PRECAUTIONS

Keep Out Of Childrens Reach
