

Environmental Health & Sanitation Chemicals

Technical Data

DeVour 100

Body Fluid Absorbent

DESCRIPTION

DeVour 100 is a natural breakthrough in technology that changes any liquid from (other than oils) into semi-solids. This eliminates messy mops, towels, rags etc., for complete removal of anything liquid.

With today's stringent rules regarding OSHA and bloodborne pathogens, DeVour 100 stands ready and able to absorb 100 times its weight of feces, urine, blood and other spills and fluids in hospitals, schools, nursing homes -- In fact every business needs our product DeVour 100.

SAFELY FOR USE

- Spills
- Vomit
- Blood
- Feces
- Urine
- Solvents
- Foods
- Chemicals
- Drinks
- Body Fluids

USES / BENEFITS

- Absorbs 100 times its weight
- Non-Toxic
- 100% Active
- High Density No Fillers
- Eliminates Malodors

PRECAUTIONS

Keep Out Of Childrens Reach
Contains No Hazardous
Ingredients.

DIRECTIONS FOR USE

Sprinkle lightly on fluids of spill or accident. DeVour 100 immediately absorbs up to 100 times its weight by absorption of the liquids into a congealed semi-solid, easy to pick up and remove. Completely counteracts any malodors immediately upon use.

Once liquid is in the congealed semi-solid mass, use a dustpan or shovel depending on the amount and place in a double waste liner tied twice and remove for waste disposal.

If using for body fluids suspected of infection by HIV (aids) or Hepatitis B, wear rubber gloves and follow guidelines for disinfection procedures set forth by OSHA.
