

Product Description

The North Woods Grease Buster Green Cube is an improved biological product, specifically formulated and packaged for use in restaurants where the water temperatures are higher. The North Woods Grease Buster Green Cube minimizes hydrogen sulfides and build up of sludge, thereby reducing odors, fecal matters, and grease compounds. This formulation resists higher temperature water to dissolve gradually over 30 to 45 days (dependent upon flow rate) allowing for continuous waste treatment with minimal application effort. To assure optimal performance of these organisms, under the toughest conditions, they are produced and blended together with "high potency" nutrients and stimulants. The North Woods Grease Buster Green Cube also contains specialty penetrants and surfactants which loosen and liquefy heavy grease deposits, thereby assisting in their biodegradation.

Grease Control in Lift Stations

The North Woods Grease Buster Green Cube is packaged specially to maximize performance in restaurant applications where water temperatures are higher.

Directions for Use:

Remove cube from carton and place into the area to be treated. Replace the North Woods Grease Buster Green Cube every 30 to 45 days with new product or as needed.

Storage

Store in cool, dry place. Avoid contact with strong acids.

Precautions

SLOW RELEASE
Disperses bacterial
product as it dissolves!

Benefits:

- Keep drain lines clean
- Reduce grease build-up headaches
- Prevent emergency blockages
- Save on line jetting
- Lower grease disposal costs
- Reduce or eliminate odors
- Last longer in hot water flow
