

Specifications

Form: Liquid
 Color: Pale Green
 Nutrient Content: Biological nutrients & stimulants
 Plate Count: 200 billion per gallon

Packaging

5, 30, and 55 gallon drums

Storage

DO NOT FREEZE! Store in a cool dry location. Do not inhale mists, avoid excessive skin contact. SEE M.S.D.S.

Fill the jet truck tank with clean water and then add 1 gallon of Jet Wash for every 100 gallons of water capacity.

“Jet Wash is the best grease control product that I have tried. It works great. Less Grease”

Case History 963

These before and after photographs show the performance of Jet Wash in an 8 inch sewer.

Here is a closer look at the pipe wall after the application of Jet Wash.

Eliminate Fats, Oils and Grease with Superior Chemical Jet Wash

The information presented in this Data Sheet is believed to be reliable. This information is provided as representative only and there are no warranties, expressed or implied, regarding its performance. Since manufacturer has no control over handling, storage, use and application conditions, manufacturer shall not be responsible for loss, damage or expense arising out of or in any way connected with the handling, storage, or use of the product described. It is the customer's responsibility to use this product in a manner that does not infringe on local laws, regulations, and third party rights.

Product Description - Grease Control in Sewers

Superior Chemical Jet Wash is an improved biological product, specifically formulated and packaged to maximize performance in jet cleaning trucks.

To assure optimal performance of these organisms, under the toughest conditions, they are produced and blended together with "high potency" nutrients and stimulants.

Jet Wash also contains specialty penetrants and surfactants which loosen and liquefy heavy grease deposits, thereby assisting in their biodegradation. The Jet Wash liquefies grease on contact and the bacteria continue working downstream to dramatically improve both the speed and effectiveness of jetting.

Benefits of Jet Wash:

- Liquefies grease on contact
- Foams well for better contact
- Safe for Waste Treatment Systems
- Grease will not re-coagulate
- Bacteria stay in the sewers
- Non petroleum formulation
- Bacteria clean downstream
- Concentrated, 1 to 100 gals of water
- Reduces time to clean
- Reduces the frequency of cleaning
- Convenient packaging
- Less corrosion in pipes
- Frees crews for other jobs
- Non-hazardous
- Environmentally friendly

HOW TO USE Superior Jet Wash

STEP ONE

Fill the Jet Truck or Trailer with clean water. Add one gallon of Jet Wash for each 100 gallons of water.

STEP TWO

Apply the solution as you jet spray the line upstream. Wait ten minutes. Jet spray again as the line is retrieved.

NOTE:

Each situation is unique but, in general, best results will be obtained at maximum working pressure and half speed on the reel. A rotating nozzle normally gives the best results. Normal levels of chlorine in the water will not affect the bacteria.

Long Lasting!

The Jet Wash Bacteria grow on the walls of the sewer to continue to grow, release enzymes and provide a long lasting effect.
