

Environmental Health & Sanitation Chemicals

Technical Data

NEW LEATHER

FOAM CONDITIONER & CLEANER

DESCRIPTION

Forget all the new high tech silicone based formulas that are designed for vinyl. You paid for real leather! Now you need to protect your investment properly. Just like your skin, leather dries out, cracks, and becomes damaged over time. New Leather was designed to gently clean and remove pore clogging dirt, body oils, non-leather cleaner residue, and atmospheric deposits from leathers delicate surface. It allows leather to breathe and retain its natural flexibility while simultaneously conditioning with a refreshing blend of emollients and conditioners. This phenomenal product then naturally shields leather against the damaging effects of sun, water, and wear. New Leather penetrates deep into the hide to eliminate costly products at their source. It provides long lasting protection to priceless heirlooms as well as your new vehicle. If you wanted vinyl - you would have bought vinyl. **Let New Leather do its job for you!**

SPECIFICATIONS

Solubility in water Complete
Flash Point None
pH 8.2

USES / BENEFITS

- **Cleans, Conditions, Restores**
- **No Slippery Residue.**
- **Protects against environmental damages.**
- **Made especially for leather.**

PRECAUTIONS

Keep out of reach of children. Do not puncture or incinerate container. Do not expose to heat or store at temperatures above 120°F.

DIRECTIONS FOR USE

New Leather works excellent on leather and vinyl - **but do not use on suede.** Due to the lavish nature of this product - we recommend testing in an inconspicuous area to allow for inspection of results. Apply lightly onto Turkish towel or other soft cloth. Gently and thoroughly rub New Leather into surface, with the grain where applicable, circular motion for all other applications. Allow time to penetrate and rejuvenate leather. Finish application with a light rub down with fresh soft cloth.
