## SOLAR BURST

HIGH PERFORMANCE FLOOR RECONDITIONER

### DESCRIPTION

Solar Burst Floor Reconditioner was designed for today's propane and other high speed buffers. The use of this product will greatly reduce labor cost and prolong the higher gloss curve of your floors. This space age formulation was made for damp mopping on the floor and then high speed burnishing the floor with either a high speed or propane ultra speed machine for a deep -- high gloss! Can be used in auto scrubbing machines and then followed by high speed burnishing. Solar Burst repairs scuffs, scratches and restores better than new gloss.

Solar Burst cleans and restores your floors to a brilliant shine in one step.

For optimum results, use with the Solar System Floor Program. First apply four or five coats of Solar Gloss Seal & Finish. Clean daily with Solar Clean!

### DIRECTIONS FOR USE

Solar Burst was designed to be part of the Solar System Floor Care Program. It is the copartner in High Speed Floor Technology, made easy by simple instructions that produce phenomenal results. Read label carefully and follow directions.

#### MOP & BURNISH METHOD:

- 1.) Dust mop floors to remove dirt.
- 2.) Add 2oz. of Solar Burst per gallon of water in a clean mop bucket.
- 3.) Damp mop floors with solution, uniformly applying a thin coat.
- 4.) Let floors dry thoroughly. Burnish with high speed floor machine and soft polishing pad.

#### AUTOMATIC SCRUBBER METHOD:

- 1.) Dust mop floors to remove dirt.
- 2.) Fill scrubber solution tank with water adding Solar Burst at 4oz. per gallon of water.
- 3.) Scrub floors picking up solution as if cleaning. Detail mop any trails that are left from behind machine.
- 4.) Let floors dry thoroughly. Burnish with propane or other high speed floor equipment.
