Technical Data

SUN FRESH

SELF SANITIZING RESIDUAL DISINFECTANT SPRAY

DESCRIPTION

Sun Fresh is a patented formulation in an aerosol can designed to be used as a 100% Total Kill Air Sweep. All germs contacted in the air, or on any surfaces will be terminated by the active formulation of Sun Fresh.

Sun Fresh makes a perfect final touch after rest room cleaning.

It's ULV valve dispersion makes it ideal for total air disinfection, a perfect spray disinfectant for all the hard places to reach, and the bottom line for reducing absenteeism in schools and the private sector work place.

PRECAUTIONS

Keep out of childrens reach.

Label use directions should be followed carefully. Can cause eye and skin irritation.

SUN FRESH has residual self sanitizing activity, killing germs for up to five (5) days!

EFFECTIVE AGAINST

VIRUCIDAL:

- HIV-1 (AIDS) Virus
- Herpes I & II
- Influenza A2/Hong Kong
- Adenovirus Type 5
- Vaccinia
- Infectious canine hepatitis
- Canine distemper
- Feline pneumonitis
- Avian Influenza (H5N1)
- Pandemic 2009 H1N1 influenza A virus (formerly called swine flu)

BACTERICIDAL:

- Escherichia coli
- Pseudomonas aeruginosa
- Salmonella schottmuelleri
- Shigella dysenteriae
- Streptococcus pyogenes
- Staphylococcus aureus
- MRSA

TUBERCULOCIDAL:

- Mycobacterium tuberculosis

FUNGICIDAL:

- Trichophyton mentagrophytes

Controls mildew growth on fabric for 14 days - 21 days on hard surfaces.

USES / BENEFITS

- Disinfect hard surfaces with a one second spray and allow to air dry. Dual quaternary activity provides effective kill on most pathogenic bacteria.
- Deodorize by eliminating all airborne malodors with this unique formulation, plus killing the originating bacteria source.
- Kills HIV-1 (Aids) on pre-cleaned environmental surfaces.

DIRECTIONS FOR USE

AIR SANITIZING

Sun Fresh should be used as a disinfectant space spray in any and all areas of no food contact. Point spray valve upwards to center of room and spray for three seconds. Sun Fresh will kill most pathogenic bacteria and virus' on contact.

SURFACE DISINFECTION

First remove any soils from surface to be disinfected. Hold can six inches from surface and spray until area desired is wet. Allow to air dry. Dries quickly leaving NO OIL FILM.
