

SYNERGY FLOOR FINISH APPLICATOR SYSTEM

An Application Method of Unequaled Performance...

Introducing the Synergy Floor Finish Applicator System. Extensive research and testing has been done to create this alternative to the traditional mop and bucket method of applying floor finish. The Synergy Floor Finish Applicator System features two outstanding floor finishes: North Woods™ Solar Diamond and North Woods™ Infinity. The Synergy Floor Finish Applicator System is easy to use and provides significant labor saving results!

QUICK

Cover 1000 square feet in 12-15 minutes versus 36 minutes with the mop-and-bucket method (ISSA Standards). With no mop and bucket to drag around, using our Synergy Floor Finish Applicator System can allow you to cover the same area in half the time!

EASY

Fingertip flow control allows for the even distribution of product and eliminates foaming versus the mop-and-bucket method.

ELIMINATE WASTE

Use what you need and save what's left! Traditional mop-and-bucket methods discard the contaminated, unused finish. The Synergy System allows you to save unused product and money.

GREATER PRODUCT COVERAGE

Because of the fingertip flow control, the lack of travel time to resaturate your mop and the elimination of waste, you can achieve up to 50% greater coverage versus utilizing the conventional mop-and-bucket method.
