# Technical Data

# AQUA BLAST

**AQUEOUS SPRAY WASH SOLUTION**

## DESCRIPTION

Aqua Blast is the latest North Woods® breakthrough in biodegradable, aqueous surfactant technology. It is an inhibited, mildly alkaline solution for maintenance and production cleaning of industrial, automotive, and air craft components. Aqua Blast's environmentally safe formula works better than the caustic, toxic, and hazardous chemicals that are typically used for this type of cleaning - yet without all the health and environmental hazards. It's designed for use in cabinet systems, jet and conveyor type washers, and for immersion cleaning equipment. Gone forever is the day of harmful vapors, carcinogenic poisons, and environmental pollutants. Gone that is...if you start using North Woods® Aqua Blast!

## USES / BENEFITS

- **BIODEGRADABLE**
- **WATER SOLUBLE**
- **NON-FLAMMABLE**
- **NON-COMBUSTIBLE**
- **NON-CAUSTIC**
- **NON-CORROSIVE**
- **NON-FUMING**
- **NON-TOXIC**
- **SAFE TO USE**
- **CORROSION INHIBITOR**
- **NON-FOAMING**
- **NO HAP's**
- **ENVIRONMENTALLY SAFE**

- Quickly removes grease, oils and carbonaceous soils.
- Replaces hazardous solvents.
- Contains no HAPS
- Does not contain any chelating ingredients, such as EDTA, caustics or chlorinated solvents.
- Contains no silicone to interfere with new coatings or paint.
- Safe for use on aluminum and other non-ferrous metals.
- Designed for use in spray cabinet, and jet washers.
- Will not build excess foam in spray cabinets.
- Mild pH of 9.6 in concentrate

## DIRECTIONS FOR USE

Designed for use in hot spray pressure cabinet systems, conveyor type washers and immersion cleaning equipment. Can be used in manual pressure wash applications. Operate equipment according to manufacturer's instructions.

**Dilution (water to Aqua Blast)**  
 light to medium soil ~ 35:1  
 heavy soil ~ 20:1
