AQUA SEAL

AQUEOUS DRAIN SEAL

DESCRIPTION

Aqua Seal is an environmentally safe, biodegradable additive for drains and waterless urinals. It is ideal to combat sewer gas, and putrefactive odors in stagnant drains and in interior building manholes, where noxious odors can be outright overwhelming. Aqua Seal's specific gravity is much lighter than that of water. This enables it to float on the surfaces of drain effluent, effectively sealing off any malodors for an extended period of time. (A very small amount is washed away with every use). If the drain or urinal goes unused, Aqua Seal is able to float on the surface indefinitely, sealing the odors inside the drain. Even with incoming water and effluent, it immediately reasimilates itself into an aqueous barrier resealing the drain. Aqua Seal is unique in that it does not freeze above -70°F. This can greatly reduce annual winterization costs. For waterless urinals, refill traps as needed with Aqua Seal by simply pouring into the trap. 3 oz. will last approximately 1,500 uses.

USES / BENEFITS

- Environmentally friendly
- Biodegradable
- Prevents sewer gas
- Fresh cherry fragrance
- Seals odors in drains/urinals
- Resists water washout
- Zero evaporation at 100F°
- Reduces maintenance costs
- Pure product
- Ends noxious odors
- Does not freeze above -70F°
- Extremely economical
- Safe to use

USE IN:

- Floor drains • Urinals • Sinks
- Interior manholes • Porta Potties • Lift Stations • Sumps
- Outdoor toilets • Fish cleaning stations • Winterization tasks

Aqua Seal floats on top fluids. As long as fluid level is above solids level...nasty odors are eliminated!

PRECAUTIONS

KEEP OUT OF CHILDRENS REACH

DIRECTIONS FOR USE

Drain Treatment: Aqua Seal is ideal to block malodors. Add sufficient product to create an aqueous seal floating above the level of liquid, waste, and organics. Aqua Seal prevents odors and sewer gas from passing and leaving the drain. A light, fresh cherry scent is all that remains. Add directly to odorous drains as needed. Replenish as necessary.

For waterless urinals, refill traps as needed with Aqua Seal by simply pouring into the trap. 3 oz. will last approximately 1,500 uses.
