

Specifications

Form: Solid
 Color: Natural (Tan)
 Nutrient Content: Biological nutrients & stimulants
 Plate Count: 3 billion per gram

Packaging

2 lbs. cube in a mesh application bag, 12 per case
 5 lbs. cube in a mesh application bag, 4 per case

Storage

DO NOT FREEZE! Store in a cool dry location. Do not inhale dusts, avoid excessive skin contact. SEE M.S.D.S.

Applications Instructions

Add the Grease Buster Brown Cube directly to the lift station.

1. When locating the cube in the wet well / lift station, DO NOT place cube directly into the flow of incoming sewage. The turbulence and "washing effect" will greatly reduce the longevity of this product. Ideally, the cube should be placed in a less turbulent area of the wet well / lift station, but not in a dead spot.
2. Cube should be suspended in the wet well / lift station so that it is always submerged in water, even at the lowest water level. This will assure maximum contact time with the organics providing superior results.
3. If a grease shelf is present during placement of cube, it is recommended to raise the high level flow so that the bacteria can attack the grease shelf from the top, bottom and sides.
4. Results should be obtained in four to eight weeks from the time of application. If grease shelves are present at the time of application, a longer period of time may be required to obtain results.

Flow Rate

Up to 25,000gpd
 Up to 50,000gpd
 Up to 100,000gpd
 Up to 250,000gpd

Maintenance

2 lb. per month
 5 lb. per month
 5-10 lb. per month
 10 lb. per month

Dosage Rate vary with flow rates, retention times and grease accumulation. This rate is for a typical lift station.

Grease in a Scum Pit:

Six foot deep grease accumulation eliminated in thirty days!

"It (Grease Buster Brown Cube) pays for itself by reducing the need for suction trucks, jetting the lines and less maintenance of floats and lift stations."
 Superior Chemical Customer

Case History 951

Case History 961

City of Boston, Massachusetts has used product since 1993 for routine, cost effective sewer maintenance.

Fats, Oils and Grease

The information presented in this Data Sheet is believed to be reliable. This information is provided as representative only and there are no warranties, expressed or implied, regarding its performance. Since neither distributor nor manufacturer has any control over handling, storage, use and application conditions, neither distributor nor manufacturer shall be responsible for loss, damage or expense arising out of or in any way connected with the handling, storage, or use of the product described. It is the customer's responsibility to use these products in a manner that does not infringe on local laws, regulations, and third party rights.

Product Description

Grease Buster Brown Cube is an improved biological product, specifically formulated and packaged for use in lift stations. To assure optimal performance of these organisms, under the toughest conditions, they are produced and blended together with “high potency” nutrients and stimulants. The Grease Buster Brown Cube also contains specialty penetrants and surfactants which loosen and liquefy heavy grease deposits, thereby assisting in their biodegradation.

Grease Control in Lift Stations

Cubes are packaged specially to maximize performance in lift stations.

How long will it last?

Field experience has shown that in a pumping station with a flow of 500,000 gpd, the cube should last 30 days. This is not to say however that in a station with a flow of 50,000 gpd that the cube will last 300 days. We have had reports of the cube lasting as long as three weeks. One customer with a pumping station with a flow of 780,000 gpd reports that the product lasts on an average of 40 days.
