# Technical Data

# MOLECULE PLUS

ODOR COUNTERACTANT TECHNOLOGY OF THE FUTURE

Molecule Plus is an exciting new breakthrough in the technology of removing a malodor from the environment without masking, adding a new odor, or using formaldehyde. Proprietary in formulation and unique in deliverance, and the ONLY way to completely remove the malodor from the environment ..... THIS IS Molecule Plus™.

Molecule Plus was developed around the Japanese' belief of "Forest Basking" -- breathing fresh air among trees. North Woods™ Molecule Plus works on that same principal that the best smell is no smell. The most effective malodor control is to create a non odor situation. The Molecule Plus System uses only a trace fragrance in the Molecule Plus Natural System. In the Molecule Plus 90 micro-cell, we now have a cold press lemon fragrance added for those who prefer the light fragrance of fresh squeezed lemons.

The Molecule Plus System completely reverses the molecule chain of cigarette and cigar odor. By simply treating any room, a smoking environment is quickly and thoroughly converted to a non smoking environment.

- Molecule Plus 24 instant Action Granules
- Molecule Plus 40 Instant Action Stick-Up
- Molecule Plus 70 Instant Action Space Spray
- Molecule Plus 90 Instant Action Wall Capsule
- Molecule Plus 100 Instant Action Concentrated
