SOIL MASTER SYSTEM

OVERVIEW

The Soil Master System is our new, revolutionary carpet cleaning system. It completely breaks up and floats away grease, dirt, food stains, and other soil - while actively preventing resoiling! It actually makes carpeting soil resistant without the use of a "carpet guard" type product! This is done utilizing new patent pending, state of the art carpet care technology. Finally a synergistic carpet cleaning system where all products work in complete unison!

The Soil Master System is approved by the Carpet & Rug Institute, meets or exceeds Green Seals GS37 standard, and is currently pending approval by the EPA for its Dfe or Designed for the Environment Program.

SPECIFICATIONS

Appearance Wet.....colorless liquid
 Appearance Dry.....colorless powder
 Odor Control Ability.....excellent
 Shelf Life 2 year minimum
 pH 7.0
 Ionic Charge Non-ionic

SPOT MASTER

Spot Master is our fantastic new carpet spot elimination product. When sprayed on spots - many just disappear almost magically! For ones that don't - simply agitate them with its companion Spot Master Brush and you won't believe the results!

Spot and small area cleaning has never been faster or more effective. Plus with the fully adjustable Spot Master Brush - there's no more getting down on bended knee to agitate the surface and no blotting required under normal circumstances! That's because Spot Master uniquely encapsulates soil and other contaminants into microscopic crystals that are easily vacuumed away during regular cleaning.

The ease and speed attained using Spot Master and the Spot Master Brush is unparalleled! Best of all, after spots have been cleaned, the carpet is simultaneously treated for resoiling! There's never been anything like it!

TRAFFIC MASTER

Traffic Master Carpet Cleaner is the second half of this synergistic system. It completely breaks up and floats away grease, dirt, food stains, and other soil - while actively preventing resoiling! Never before has there been a concentrated carpet cleaner that does what Traffic Master can. Its cleaning ability is unmatched using extraction, rotary, or bonnet cleaning - it even works great as a prespray for dry carpet cleaning products! It utilizes patent pending, carpet care technology designed to fully penetrate fibers and unlock soil and residue left behind from other carpet cleaners hidden deep within them. Traffic Master uniquely encapsulates soil and other contaminants into microscopic crystals that are easily vacuumed away during regular cleaning

DIRECTIONS FOR USE

Completely read and follow label directions for both products.
