DIRECTIONS FOR USE

Cleaning: For cleaning, use 2 to 8 ounces of this product per gallon of water.

Disinfecting: Prepare 5 ounces of this product per gallon of water and thoroughly wet the surfaces to be disinfected. (For disinfecting contagious disease areas, use 8 ounces per gallon of water.) The disinfecting solution must contact the surface for 10 minutes for proper disinfection. If desired, the surfaces may then be rinsed with clear water or wiped with clean damp towels.

For Cleaning of Walls, Floors and Industrial Work Areas: Use 5 ounces per gallon of water. The use of rubber gloves is recommended for personnel doing contagious hand cleaning.

For Mildew Control: Use on enamel, porcelain tile and plastics to control mildew. Follow directions for disinfection. Repeat treatment every seven days, or when new growth appears. This product may be used through automatic floor scrubbing equipment and pressure washers.

See container label for special instructions for cleaning and decontamination against HIV-1 (AIDS) of surfaces/objects soiled with blood/body fluids.
