Technical Data

TUF GEL

INVISIBLE LONG LASTING TEFLON® LUBE

DESCRIPTION

Tuf Gel is a high tack, grease-like gel which provides superior lubrication at temperatures ranging from -30°F to +500°F. It's clean, clear liquid penetrates as an oil to the lubrication point, then forms into a tacky anti-friction gel. It contains a fine Teflon® powder which provides superior wear and lubrication. Tuf Gel resists water washout and weathering, even under extreme conditions. It prevents rust and corrosion and seals parts with a moisture resistant barrier.
